***Response to Arguments***

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

After a careful examination of the Applicant's arguments the Examiner has withdrawn the rejection because McCombe et al US Patent Pub. 2004/0199251 A1 is NOT prior art. McCombe et al was filed on April 01, 2003 and the Application foreign priority was filed on August 20, 2002.

***Allowable Subject Matter***

Claims 1, 2 and 4-6 are allowed.

The following is an examiner's statement of reasons for allowance: After careful consideration of the Applicant's remarks the Examiner has found the independent claims are allowable. There is no evidence in the prior art of an intervertebral implant having upper and lower surfaces, a pair of side surfaces connected to the upper and lower surfaces, a front end side of the intervertebral spacer and a rear end side of intervertebral spacer. The upper and lower surfaces having a plurality of linear claw portions continuously extending from one of the pair of side surfaces of the body to the other of the pair of side surfaces of the body and continuously extending from the front end side of the body to the rear end side of the body. Each of the plurality of claw portions having a vertex, with the respective vertexes arranged along a curved surface formed to extend generally longitudinally of the body and such that a distance between the upper and lower surfaces at the front side of the spacer is greater than a distance between the upper and lower surfaces at the rear side of the spacer.
